Create your own Robomate+ Enabled Institution

Robomate+ is an educational technology platform, which works on student's enablement, teacher's empowerment and parent's satisfaction; contributing to a 3-way partnership at institutions. This platform offers various components like **ROBOADMIN** where a central console for learning management system offers unique identification for the students and registers their attendance, scheduling, payments etc. **ROBOBOOKS** is a delight and wow contribution of this platform, as it digitalises the study books and notes, nullifying the heavy weight of the school bags. **ROBOASSESS** offers question banks, end-of-the-module and chapter-wise tests, in addition to the adaptive assessments that are displayed depending on the students' performance. And in turn builds the ability to solve difficult sums and questions. The perfect way of mapping students study need, drawing up the customised learning plan is contributed by **ROBOANALYSE** which displays information about students' conceptual clarity, analytical thinking, speed, accuracy and lateral thinking etc. Students are known to benefit greatly from peer learning and at times teacher-assisted collaborative learning. **ROBOGROUP** facilitates this experience. Institutions can create their own content and a repository by tagging it and saving it in **ROBOREPO**. Subject experts can thereafter update and contribute to it on the regular basis creating an intellectual property for the institutions or as a value-add to their unique selling proposition.

CREATE YOUR OWN STUDY APP ↓

Your School → ABC

can be on our technology platform enabled by Robomate +

Create your own ABC app

Digitised books/ Analytical reports /
School Administration/ Content Repository /
School Study Groups for students and teachers to
connect live.

Robomate+ Learning Management System Enabled Classroom

Key features

Content

1. Syllabus Based
2. As per Text Books
3. Exam Oriented
4. Planned for grade improvement
5. Easy and Modular
6. Student friendly with audio visual medium

Assesment

1. Collection of over 2 lakh questions from class 8 to class 12 and competitive exams like JEE and NEET, MHT-CET, KCET etc.
2. Provision to upload your own questions and tag them on various parameters
3. Provision of creating your own question papers or filtering questions on existing parameters
4. Provision for assigning tests to various batches / students
5. Detailed report highlighting ranking and areas of improvement (objective)
6. Diagnostic report, Benchmarking against toppers, etc available on tests based on competitive exams.
7. Provision for both subjective as well as objective tests

Analytics

1. Overall Performance Analysis
2. Time Management Analysis
3. Negative Marking Impact Analysis
4. Subject & Question wise Analysis
5. Difficulty Level wise Analysis
6. List of Areas of Improvement
7. List of Remedial Measures
8. Ranking and Dynamic Ranking - Geography wise
9. Benchmark against the Topper, Top 10 percentile students, etc.
